IN THE HALLWAY

For this month's In The Hallway, share something about yourself and your thoughts on plant science on ASPB's group FaceBook page. You'll see that we've set up a prompt on the discussion board. Let's see how many responses we can get!

Here are some ideas to get you started, but don't let these limit your input...

- If money were no object what would you study/research?
- What is your favorite time-saving protocol?
- What qualities makes someone a good research assistant?
- When you first started your science career, what did you find most surprising?
- What do you think has been the biggest advance / discovery in plant science in the past 10 years?
- What do you think will be the next big advance/discovery in plant science?
